(1) The construction years are given as an indication and may vary depending on the model and the production sites. (2) The SPH-EVO multimedia system (208/2008) covers a large number of vehicles. Manufacturers are constantly changing vehicles (software / mechanics), so it is possible that some vehicles are not compatible with the Pioneer system. (3) The type of screen is indicated on a label on the chassis of the original product. IMPORTANT : "Comfort" information (eg consumption performance, digital tachometer, ...) is integrated and managed by the original screen itself. If this screen is replaced by an SPH-EV062DAB this information will be lost. However, all the settings essential to the operation of the vehicle will be available.
