

# Product Planning Installation Specialist

---

## Job description

At Pioneer Europe we are on a quest to drastically improve the driver's experience. Pioneer, as its name suggests, has always been at the forefront of innovation. Making products compatible with modern vehicles is becoming increasingly challenging.

In this context we are hiring a junior product installation specialist to help us create the vehicle integration solutions of the future.

## Who are we looking for?

We would like to extend our team based in the Antwerp port with an **up-and-coming product installation specialist**. You have a couple of years of experience in installing car electronics and/or are acquainted with our in-car products. Preferably you feel just as comfortable in a workshop as you do in an office environment. We are looking for somebody with **drive**. Somebody who looks at the automotive world and wants to make it better, a whole lot better. You will be supporting the European product team as well as the European team involved in creating innovative solutions.

## Your profile

- Ideally you have a degree in Automotive Technology, ... or you have proven experience in one or more of those areas.
- We are looking for somebody with 2-5 years of experience in the automotive, technology or commercial industry with B2B communication as a plus.
- You are pro-active and have an open mindset. You have a **creative mind**, and you can't wait to share your ideas with the world.
- You have an eye for detail, a car has no secrets for you and you can think outside the box when it comes to creating new solutions for our customers.
- You are **fluent in English** – we have teams all over the Europe, so this is a must.
- You love technology-and have a passion for cars.

## Job Content

- Create and source new installation solutions for our products.
- Contact suppliers for information and quotations.
- Test installation solutions for evaluation.
- Prepare products assets for our sales teams (pictures, datasheets, overviews etc).
- Offer installation support to our service teams.
- Investigate market claims on our existing solutions.
- Extend our product range to maximize our sales potential.

## What we offer

- The opportunity to influence how people experience driving in the near future. You will be working with technologies such as display audio, dashcam, audio and speakers.
- A full-time job, based in Pioneer's European HQ in Melsele.
- A very competitive compensation package with multiple extra-legal benefits.
- We offer remote working and flexible working hours.
